

required. Please phone for a free quotation. All **ANPROLAC** cultures represent both premium quality and excellent value for money.

ANPROLAC NUTRIENT

ANPROLAC NUTRIENT contains a blend of amino acids, peptides, vitamin B, pantothenate, polysaccharides and trace elements, such as Mn, Mg and K.

ANPROLAC is also rich in cellulose ; this product acts as a substrate by providing an inert surface on which the bacteria can adhere and assists in improving the rate of MLF by increasing the suspension of malolactic cells during the secondary fermentation.

Dosage Rate: 20g/100L

Addition to Wine: Mix **ANPROLAC** Nutrient in 10 times its weight of clean, chlorine free water and add to wine after alcoholic fermentation is complete.

NOTE: Avoid direct contact between **ANPROLAC** and **ANPROLAC** Nutrient.

Pack sizes: 3g, 12g, 60g, 120g, 300g, 600g & 1200g.

SAFETY & HANDLING DATA

ANPROLAC should be stored in a deep freeze at minus 20 degrees centigrade.

Care should be taken in handling **ANPROLAC** to avoid protein sensitisation. If body contact is made, rinse with water and avoid inhalation of dust.

Leuconostoc preparations are classified as NOT dangerous materials by the EEC.
